

BERNINA⁺

The classic mechanical model

1008 **BERNINA⁺**

The legendary 1008 model is the last purely mechanical sewing machine in the BERNINA range, and has been a bestseller for decades. Extremely easy to use, it features the outstanding BERNINA stitch quality, infinitely adjustable stitch length and width, slim free-arm, feed-dog drop and a robust metal housing. This makes the 1008 a practical, fully-fledged companion for sewing garments, gifts and accessories, as well as for quilting.

Sewing can be that easy!

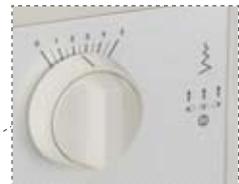

Stitch selection
The stitch selection chart tells you which presser foot, needle position and stitch length and width best suit the selected stitch.

Bobbin winder
For even winding of the bobbins. The winding stops automatically when the bobbin is full and the thread can be cut 'on site'.

Thread cutter
Easy cutting of threads when removing the sewing project from the machine. Upper and lower threads are safely secured without interlooping until the next time you sew.

Stitch width and needle position
Simply use the appropriate dials to infinitely adjust stitch width between 1 and 5 mm and to choose from 3 needle positions.

Presser feet
The BERNINA 1008 model comes with the robust, high-quality BERNINA presser foot no. 1. The standard package also includes a shaft and the most frequently used presser foot soles.

Buttonhole
Sewing standard buttonholes in six steps couldn't be easier. Add gimp for corded buttonholes to give them an especially raised look.

Free-arm
The especially slim free-arm enables easy and flawless sewing of tubular items such as children's clothing, sleeves, cuffs, collars and trouser hems.

Feed-dog drop
Some sewing tasks – darning, for instance – do not require automatic feeding. Turn the setting wheel to lower the feed-dog. The fabric can then be freely guided and fed under needle exactly as you wish.

Stitch length
Infinitely adjustable stitch length. Use the setting wheel to adjust the stitch length as wished – any length from 0 to 5mm.
